Dr. Theresa Long, medical officer with the United States military, has testified in court that she was ordered by a superior to suppress Covid-19 vaccine injuries following the Biden regime's mandate.

Dr. Long also testified that the data is showing that deaths of military members from the vaccines exceed deaths from COVID-19 itself.

The DoD downplayed Dr. Long's conclusions, saying the increase in vaccine injuries was caused by a "[glitch in the database](https://amgreatness.com/2022/02/02/politifact-rates-shocking-dod-medical-data-as-false-because-of-a-glitch-in-the-database/) (<https://amgreatness.com/2022/02/02/politifact-rates-shocking-dod-medical-data-as-false-because-of-a-glitch-in-the-database/>)."

During the all-day hearing, Liberty Counsel presented compelling testimony from the Navy Commander of a surface warship and three military flight surgeons, Lt. Col. Peter Chambers, Lt. Col. Teresa Long and Col. (Ret.) Stewart Tankersley, M.D. In contrast, the DOD declined to present witnesses.

Founder and Chairman of Liberty Counsel Mat Staver said in an interview with the Blaze's Daniel Horowitz that there have been three hearings in this case, and the DoD has not yet offered a single witness. Instead of witnesses, the government "sends these declarations," Staver explained. He said the judge has urged them to bring live witnesses to court so they can be cross examined, but they just refuse to do it. "So they send these declarations that some JAG attorney writes, and somebody in the military signs off on them." ^

Staver said that the information the DoD has been presenting in court is “outdated, wrong, and would really be subject to dismantling under cross examination.” He added that cross examinations of his witnesses have only made their case stronger. “So they really don’t have anything to cross examine our witnesses with,” he said.

Staver told Horowitz that Judge Merryday has chastised the DoD lawyers during the hearings, telling them they have “a frail case,” and are “acting as though they are above the law.”

Dr. Theresa Long, a flight surgeon who holds a master’s degree in Public Health and is specially trained in the DMED, gave emotional testimony on March 10.

She and two other flight surgeons reviewed DMED last year and made some stunning discoveries about the high incidence of apparent vaccine injuries among members of the military.

According to the whistleblowers, certain disorders spiked after the vaccine mandate went into effect, including miscarriages and cancers, and neurological problems which increased by 1000 percent.

Dr. Long testified that she was contacted by high level officer the night before the hearing, and told not to discuss her findings regarding the explosive military medical data in court. The whistleblower reportedly said she felt threatened after she tried to get her superiors to address the findings, “fearing for her life and for the safety of her children.”

Politifact contacted Peter Graves, spokesperson for the Defense Health Agency’s Armed Forces Surveillance Division, who said the data for 2021 is correct, but for some reason, the data for the five years prior was inaccurate. Graves told PolitiFact (<https://amgreatness.com/2022/02/02/politifact-rates-shocking-dod-medical-data-as-false-because-of-a-glitch-in-the-database/>) by email that the division reviewed data in the DMED “and found that the data was incorrect for the years 2016-2020.”

In other words, for five straight years, the data was seriously corrupted and none of the DoD’s data analysts figured this out, and then it fixed itself on its own in 2021. The DoD has since put out new numbers showing more illnesses among the troops for the years prior to 2021.

Staver asked Long a question about the DMED data during the hearing, and she answered: “I have been ordered not to answer that question.”

Judge Merryday reportedly asked Long: “Ordered by who?,” and the doctor explained what happened the night before the hearing.

^

Staver then asked Long if the information the military ordered her to withhold was relevant and helpful for the court and the public to know. She said, “yes,” and Staver asked her why.

Long reportedly paused and choked back tears as she told the judge: “I have so many soldiers being destroyed by this vaccine. Not a single member of my senior command has discussed my concerns with me ... I have nothing to gain and everything to lose by talking about it. I’m OK with that because I am watching people get absolutely destroyed.”

The doctor said she is constantly contacted by people who have been injured by the genetic vaccines, and that many of those injured are pilots, who are expected to meet high fitness standards. Long told Staver that in just one afternoon she heard from four pilots who had just gotten MRIs back showing that they had myocarditis.

Morale is tanking in the military, she testified, with soldiers are in despair over the pressure to get the vaccine, and some are even having suicidal thoughts.

Long said she was aware of at least two people who have committed suicide over the pressure, and the threat of punishment for refusal.

She said the current regime’s policies are undermining “good order and discipline.”

Staver finished: “I am honored to serve the brave men and women of the military. I am dismayed by the abuse and propaganda forced upon them from the White House and the Department of Defense. The truth will prevail, and freedom will win.”
